

ONE PLANET AFTERSCHOOL & SUMMER PROGRAM

“Helping children thrive by providing opportunities for children to learn, grow and have fun after school and during the summer.”

One Planet Program provides a variety of educational and enriching after school and summer activities for elementary and middle school students in Sharon, South Royalton and Tunbridge.

After school, we provide students with homework help and a healthy snack on a daily basis and offer a different enrichment activity each day, such as ceramics, digital photography, circus jump roping, Lego League, dance, computer literacy, cooking, sign language and more. We also offer academic tutoring services to referred students. Our activities and tutorials are taught by experienced, qualified teachers, many of whom work at the schools during the school day.

During the summer, we provide four weeks of full-day summer programming. The summer program offers active, experiential learning opportunities for elementary students. We develop our activities and plan our fieldtrips based on weekly themes, such as “Myths & Legends” and “Things that Fly, Float and Go Bang.” Program also includes two weeks of swimming lessons.
